NOTES

- The cylinder's O-ring is a crucial component that must be handled with care and installed correctly. Selling it to customers can lead to improper installation and potential safety hazards. These components are sold to Morini dealers only with certificated course done in Morini.
- As for the 162113T, it is a specialized part that requires specific knowledge and training to install properly. Therefore these components are only sold to official Morini dealers with certificated course done in Morini.
- Starting in 2024, we will be implementing a new policy regarding warranty claims. We will no longer ship replacement parts until the defective part has been returned to us for inspection. This allows us to verify and understand the origin of the problem, if it's a defect of the product or not. In case of emergencies, we are going to charge the replacement until we have received the part and verified the cause. After approving the claim, we will provide the credit note.
- Our cylinders are TÜV Süd certified
